

# WCFS 2026

## SINGAPORE

### 6th World Conference on Floating Solutions

October 19 - 21, 2026 • Singapore EXPO

Floating solutions are rapidly moving from concept to reality, transforming the way we approach energy, food and climate resilience in our oceans. From renewable energy and offshore oil & gas to aquaculture, floating cities and coastal protection, these technologies are unlocking new possibilities for sustainable and resilient development. With these innovations shaping the future of our oceans, there is a growing need for a dedicated platform where experts, policymakers and industry leaders can exchange knowledge, collaborate and explore emerging opportunities. The World Conference on Floating Solutions (WCFS) 2026, hosted by TCOMS and the Society of Floating Solutions Singapore (SFSS), provides such a platform.

The theme of WCFS 2026, **“The Next Frontier: Marine Infrastructure for Energy, Food, Climate Resilience and Ocean Space Utilisation”**, reflects the growing importance of integrated, sustainable solutions in the marine environment.

The conference brings together professionals from academia, industry, class societies and regulatory agencies to foster high-level dialogue and collaboration, advance innovation and help shape the next generation of floating infrastructure.

#### Message by Professor Choo Yoo Sang

*WCFS 2026 Conference Chair*

It is with great enthusiasm that I invite you to join us in Singapore for what promises to be an inspiring and impactful conference. The WCFS 2026 brings together leading experts, innovators and industry practitioners from around the globe to share insights and latest advances in floating solutions - a field that is rapidly shaping the future of sustainable infrastructure. Your engagement will contribute to vibrant discussions and knowledge sharing, enabling advancements that lead to practical and scalable solutions with global impact. Together, let's shape the future of floating solutions!

# CONFERENCE FACT SHEET

## **THE CONFERENCE:**

WCFS is the annual flagship conference which gathers hundreds of participants from researchers, businesses, public agencies and regulators from all around the world to engage in meaningful theoretical and practical exchanges. Founded and owned by the "Society of Floating Solutions, Singapore (SFSS)", the WCFS is built on a strong foundation provided by an interdisciplinary International Scientific Committee (ISC). The first edition of WCFS was held in Singapore in 2019, second in Rotterdam in 2020, third in Tokyo (2023), fourth in Hong Kong (2024) and fifth in Finland (2025).

## **BUSINESS TRACK:**

The conference features sessions that connect technical innovation with business strategy, helping participants explore commercialization, industry trends and partnerships

## **SOCIAL EVENTS:**

Banquet; Lunches; Coffee Breaks

## **TECHNICAL TOPICS:**

### ***Ocean Renewable Energy***

Floating offshore wind, floating solar platforms, floating tidal energy, floating hydrogen/ammonia production

### ***Ocean Space Utilisation***

Floating cities, floating airports/maritime/offshore hubs, floating desalination and offshore freshwater, floating nuclear power station

### ***Aquaculture***

### ***Climate Adaptation and Coastal Resilience***

### ***Construction Materials, Manufacturing & Industrialisation Technology***

### ***Marine Installation, Operations & Management***

### ***Blue Economy and Multi-Use Oceans***

Marine spatial planning, environmental, biodiversity, coexistence, community, and sustainability

### ***Investment, Finance, Policy & Risk***

Strategic, economic, regulatory, insurance and permitting

# IMPORTANT DATES

## **Abstract submission:**

19 January 2026 – 31 March 2026

## **Notification of abstract acceptance:**

9 February 2026 – 30 April 2026

## **Full paper submission (optional):**

19 June 2026

## **Early-bird registration**

2 February 2026 – 31 May 2026

## **Standard registration**

1 June 2026 – 30 September 2026

## **Conference begins:**

19 October 2026
